Call for Papers

1st International Symposium of Health Informatics in Latin America and the Caribbean

In conjunction with the 11th Latin American and Caribbean Conference for Engineering and Technology

August 14, 2013, Iberostar Hotel, Cancun, Mexico

We are soliciting papers that deal with all aspects of health informatics in Latin America and the Caribbean. Any research that addresses health disparities in Latin America and the Caribbean and helps to build collaborations to identify issues in medicine and healthcare in these regions is welcome including but not limited to the following topics:

a. Public health informatics
b. eHealth projects
c. Digital agenda in health sector
d. Telemedicine projects
e. Translational bioinformatics
f. Clinical research informatics
g. Clinical informatics
h. Medical informatics
i. Biomedical informatics
j. Nursing informatics
k. Data mining in medicine and healthcare
l. Visual analytics in medicine and healthcare
m. Any research that addresses the objectives of the conference

The three main objectives of the symposium are to showcase the health informatics research in Latin America and the Caribbean and describe the challenges and lessons learned, to identify common issues that may be addressed with informatics, and to brainstorm on how to bridge the gaps among disciplines to develop more collaborative and diverse research teams for more efficient solutions to health informatics issues in developing countries.

Dates:
Deadline for Extended Abstracts: May 10, 2013
Deadline for full papers: May 10, 2013
Notification of acceptance: June 3, 2013
