

PROJECT EVALUATION FORM

To review/evaluate a project you must download the corresponding paper from the EasyChair platform.

1. Title of the paper being reviewed: _____

2. Paper Number: _____

Criteria 1: Problem: The paper shows that there is a significant need or problem that the project is trying to solve.

A need or problem is a situation in which it is possible to make an improvement to existing conditions. A major problem causes a discomfort or inconvenience to users. Describe the discomfort or need.

Very much disagree 1 2 3 4 5 Very much agree

Criteria 2: Solution: The project is shown to solve a significant problem.

The product, service, technology, or process solves at least one aspect of the need or problem.

Very much disagree 1 2 3 4 5 Very much agree

Criteria 3: Innovation: The project demonstrates that the solution is unique in terms of concept, technology, or accessibility to it.

The project (product, service, technology, or process) differs from other solutions that try to solve the problem in terms of features, user accessibility, or other aspects.

Very much disagree 1 2 3 4 5 Very much agree

Criteria 4: Impact: The paper shows that there is a significant number of people or organizations (potential users) who have the problem that the project will solve.

Very much disagree 1 2 3 4 5 Very much agree

Criteria 5: Feasibility: The paper demonstrates that the proposed solution is or may be attainable to the individuals or organizations that have the problem.

The project's solution is conceptually feasible and applicable. Paper presents photos, surveys, sales, etc.

Very much disagree 1 2 3 4 5 Very much agree

Comments and recommendations for the project.
